

## **Digitech Studio School: Provider Access Policy Statement**

### **Introduction**

This policy statement sets out the school's arrangements for managing the access of providers to the school for the purpose of giving them information about the provider's education or training offer. This complies with the school's legal obligations under Section 42B of the Education Act 1997. Digitech Studio School and the Cabot Learning Federation is committed to providing all students with information about the full range of learning and training pathways that are available to them. This includes a range of colleges, Universities, and other post 16 providers. We also welcome providers that offer routes such as apprenticeships and T levels.

### **Student entitlement**

All students in years 10 -13 are entitled:

- To find out about technical education qualifications and apprenticeships opportunities, as part of a careers programme which provides information on the full range of education and training options available at each transition point;
- To hear from a range of local providers about the opportunities they offer, including technical education and apprenticeships – through options events, assemblies, group discussions and taster events;
- To understand how to make applications for the full range of academic and technical courses.
- In accordance with the provider access legislation set out from January 2023 Digitech Studio School will provide the following interactions as a part of their CEIAG offer.
- By the end of year 11 all students will attend at least two encounters delivered by different providers. This will be offered during the academy day.
- By the end of year 13 all students will be offered two additional encounters. Unlike the previous two encounters participation will be optional.

For students of compulsory school age these encounters are mandatory and there will be a minimum of two encounters for students during the 'second key phase' (year 10 to 11). These provider encounters will be scheduled during the main school hours and the provider will be given a reasonable amount of time to, as a minimum:

- Share information about both the provider and the approved technical education qualification and apprenticeships that the provider offers.
- Explain what career routes those options could lead to.

- Provide insights into what it might be like to learn or train with that provider (including the opportunity to meet staff and students from the provider).
- Answer questions from students.

### **Meaningful provider encounters**

One encounter is defined as one meeting/session between students and one provider which will be delivered to the entire year group. Providers must also facilitate a question and answer component. We are committed to providing meaningful encounters to all students using the Making it meaningful checklist. Meaningful online engagement is also an option, and we are open to providers who are able to provide live online engagement with our students.

### **Destinations of our students 2025 school leavers:**

Last year our year 11 students moved to range of providers in the local area after school:  
Data provided by South Gloucestershire Council

- 95% in education or training (11% of this figure accounts for apprenticeships)
- 4% NEET
- 1% Other

### **Management of provider access requests Procedure**

If you wish to request access to Digitech Studio School you should contact Jane Morgan (Careers and Pathways Lead) on [jane.morgan@clf.uk](mailto:jane.morgan@clf.uk). Contact should be made as far in advance as possible and at least a minimum of two calendar months ahead of any dates that an academy is being asked to consider. Digitech Studio Schools plans a number of events, integrated into the school careers programme that will offer providers an opportunity to come into school to speak to students and/or their parents/carers. Details of that programme can be found on the school website, or by contacting the Operations Manager at the academy. On deciding which requests can be accepted the academy will consider:

- Whether the request is suitable for the targeted cohort of students
- Whether the request can be incorporated into plans already in place to support students, such as careers assemblies and raising aspirations conferences
- Whether the requestor has already had access to the relevant cohort of students
- Any existing activities, trips or visits (to or from the school)
- Whether any disruption will be caused to the curriculum or to examinations or examination preparations

- Staff availability
- Appropriate facilities available

Where a request cannot be accommodated, the school will set out the reasons for this decision. If the request is deemed suitable but not practical due to timing, the school will work with the provider to identify the next opportunity to accommodate the request. Digitech Studio School will make the main hall, classrooms, or private meeting rooms available for discussions between the provider and students, as appropriate to the activity. Digitech Studio School will also make available AV and other specialist equipment to support provider presentations. This will all be discussed and agreed in advance of the visit with the Careers and Pathways Lead. Meaningful online engagement is also an option, and we are open to providers who are able to provide live online engagement for our students. Providers are welcome to leave a copy of their prospectus or other relevant literature which will be available to students either in reception or with the Careers and Pathways Lead.

### **Complaints**

Any complaints with regards to provider access can be raised following the school complaints procedure or directly with The Careers & Enterprise Company via [provideraccess@careersandenterprise.co.uk](mailto:provideraccess@careersandenterprise.co.uk)
